Subject: Microsoft Settlement

Dear Department of Justice:

It is time to settle this case. It has gone on far too long. You will never please everyone, including the nine states that have refused to accept the proposed settlement. I think the judge should just tell those nine resisting states that his/her decision will be final and binding. Let's just get this over with. Microsoft has made a generous settlement offer. The judge can offer modifications to the proposal if needed. But, please decide something and close the case. It is costing the consumer in terms of dollars and confusion to keep this ongoing.

Sincerely,

Dr. Jim Rodgers
